PROFESSIONAL SUMMARY

Motivated Software Engineering student specializing in backend development and digital solutions. Experienced in creating and maintaining scalable software products and services using Java and Spring Boot. Strong understanding of financial systems, customer-facing applications, and data-driven engineering solutions. Passionate about building digital platforms that support financial services, mortgage-related workflows, and enterprise-level applications.

TECHNICAL SKILLS

Programming Languages: Java, Python

Backend Engineering: Spring Boot, REST APIs, Microservices

Database: MySQL, JPA, Hibernate

Tools & Platforms: Git, GitHub, Swagger, Postman

Domain Knowledge: Financial Services Platforms, Digital Products, Customer-Facing Systems, Backend Service Architecture

PROJECTS

Travel Booking System (Digital Service Platform)

Technologies: Java, Spring Boot, REST API, MySQL

- **Engineered and maintained backend services for a digital booking platform.**
- **Designed RESTful APIs supporting customer-facing financial transactions.**
- **Integrated MySQL database using JPA for structured financial data handling.**
- **Created scalable digital solutions focused on service reliability and performance.**
- **Documented APIs using Swagger to support product and service teams.**

Park Booking System (Service-Based Application)

- **Developed backend architecture for a service-oriented application.**
- **Applied software engineering principles to create maintainable code.**

INTERNSHIP

ERP & CRM Development Intern – AJ&VJ MEDIA

May 2025

- **Contributed to digital product development for ERP and CRM systems.**
 - **Assisted in creating customer-facing modules aligned with business services.**
 - **Collaborated with cross-functional engineering teams using Agile methodology.**
 - **Maintained version control and product releases using Git.**
-

EDUCATION

B.Tech – Information Technology

Sri Krishna College of Technology (Anna University)

CGPA: 7.53 | 2023–2027

CERTIFICATIONS

- **Java Programming – Infosys**
 - **Spring Boot Fundamentals – Infosys**
 - **Digital Marketing – Coursera**
 - **Linux System Management – Coursera**
-

PROFESSIONAL SKILLS

- **Creating scalable backend systems**
- **Maintaining digital products and services**
- **Engineering customer-focused applications**
- **Strong analytical and financial data handling skills**
- **Collaborative team contributor**
